HEYEE GLOBAL CONSULTING DEPT (GCD)

HEYEE GLOBAL CONSULTING is a leading international consulting Group managed by world most experienced and talented scholars, polymaths born with Gods gifted-extraordinary-abilities of thinking and knowing things beyond the expected limits of present existences in human revolution.

We deal in very unique top class subjects and offer best of rare solutions with new innovations and creations. When others say they have done at their best possible limits and nothing beyond is possible; from there, we start creating our ideas to deliver new revolutionary results in which no one ever think of any possibilities. That's why we say that some greatest things can only be done by extraordinary people with God's gifted super-abilities.

Therefore, when there is no way out, just relax, believe in God and yourself; there is always a solution for best results----make sincere efforts to see that!

We support and develop business and social/political policies in few chosen fields those are:

1. Support and Business development for medium and large scale Corporates who went bankrupt or has big losses.
2. Business expansion for a rapid multiplied growth (*Medium and large scale only*).
3. Central Government Ministries for policy developments and new creations.
4. State Governments for financial development, policy and strategy development, political and governance problem solving.
5. Political parties for planning and strategy development, stability and wining solutions, financial developments etc.

We specialise in creating, developing the optimal fly-high strategy for a rapid growth and stability in business and politics. We deliver a combination of value-added and high quality solutions to our clients that immediately result in growth and profits.

State government can enjoy best of our support and development services in terms of financial growth and availing extra funding, ministerial management strategy for overall development in the state and making an optimal master plan to establish long term political stability including social connectivity and foundation based strength.

## STATE GOVERNMENT POLICIES

Beside the routine frameworks and regular activities of the government, state governments can have global standard of governing policies to overcome all time involved internal and external complex issues so that the leaders can focus more on foundation growth which includes economic capacities, infrastructures, job creation, productions in services and materials for National and International markets, participation in global platforms and sufficient resources of political mobilisation and other popularities etcetera.

These all can be achieved through various global partnership, exchanges and support planning which is the complete extra development and additions to the Central government programs and assistants.

We believe that to do anything or more things in the state by depending to a single line of means which is central government is not sufficient enough to make our dream comes true for political leaders as well as general public.

This is the reason many states remain with not much of choices but just maintaining to survive all these years.

Therefore, we need an optimal master plan, not only locally operative but globally feasible so that we explore more in development in every aspects of necessities. Indeed, any political party or leaders who understand and have such vision and adopt master policies can rule longest time with popularity while development standard and growth touch the sky and every citizen say "we are proud of having you".

In a good intention, we have made our valuable mission for a good purpose to proactively utilise our wisdom and abilities in providing support and develop large business corporates who went bankrupt or had big losses. Many of large size corporates who went bankrupt usually fail to overcome or take longer time to stabilise their financial position. In such scenarios, we can take a vital role to redesign, develop their business for a multiplied revenue and promote for a rapid growth within a targeted short span of time frame.

On the other hand, if such specialization in creativities and developments is used to expand more business, especially for the successfully running business organisations; what will be the additional multiplication of revenues and growth! That's why we are open for these two domain such as for:

- 1) medium and large size corporates who are in emergency alarm in revenue or red alert in financial stability and;
- 2) medium and large size corporates who wish business expansion more than their existing capacities with a mission of large revenue multiplication and growth.

To start a new beginning of growth and popularity with higher grades and developments, you are welcome to contact us at any point of time to fix for a business discussion meeting.

# Thank you !
